

Nav Bus Interface Control Document

1. Scope

System: Navigation Data Bus (Nav Bus)

Spec Date: 2026-04-10

Approval Status: Draft

This document defines the interface between the Navigation Computer and the Flight Management Unit over the Nav Bus. See Figure 2 for the physical topology.

2. Interface Overview

Signaling Rate: 50 kbps

Bus Voltage: 5 volts

The Nav Bus carries periodic messages from the Navigation Computer to the Flight Management Unit on a fixed schedule.

3. Signal Definitions

Message	Update Rate	Word Length
---------	-------------	-------------

4. Data Formats

Numeric fields use two's complement signed integers, most significant bit first.

[FIGURE: figure1.png]

5. Revision Notes

Initial draft for review.
